User Stories

Must-Have User Stories

As a user, I want to be able to create and edit an account so that I can manage my personal information.

As a user, I want to be able to save my personal restrictions into my account so that I can easily access them for future searches.

As a user, I want to be able to perform a search with multiple (>2) restrictions so that I can get accurate results catered to my needs.

As a user, I want to be able to select from a wide variety of restrictions so that I can accurately search based on my needs.

As a user, I want to see images of the restaurants included in the search results so that I can better make a selection.

As a user, I want to see contact information of the restaurants for each search result so that I can contact a restaurant if necessary.

As a user, I want to read detailed information (see information display below) about each given restaurant so that I can make an informed decision.

As a user, I want to see geographical information about where search results are located so that I can conveniently consider location in my restaurant selection.

As a user, I want to be able to submit complaints/requests so that I can report any issues with the application or provide new restrictions to include.

Good-to-Have User Stories

As a user, I want to see meal information in my search results so that I can factor meal information into my restaurant selection.

As a user, I want to be able to “favourite” restaurants so that I can reference restaurants I enjoyed later.

As a user, I want to be able to clearly see my “favourited” restaurants so that I can view what I have previously enjoyed.

As a user, I want to be able to “unfavourite” restaurants so that I can edit my current “favourites”.

Nice-to-Have User Stories

As a user, I want to see my historical searches so that I can keep track of my recent activity.

As a user, I want to be able to include cuisine preferences in a given search as well, so that I can further customize my experience.

As a user, I want to see recommended restaurants based on my personal restrictions so that I can easily try new places.

As a user, I want to be able to leave reviews/comments so that other users can read about my experiences at a given restaurant.

Will-not-Have User Stories

As a user, I want to be able to “friend” other users so that I can be a part of a community and follow their activity.
